

NAZIM HUSSAIN

AI ENGINEER

ABOUT ME

Innovative and analytical AI Engineer (Final-Year Undergraduate) with proven experience in Machine Learning, Deep Learning, and Computer Vision. Skilled in designing, training, and deploying intelligent systems such as digit recognition models, trading bots, and face recognition applications. Adept at using Python, TensorFlow, and Open-CV to build real-world AI solutions. Passionate about automating tasks, optimizing neural networks, and delivering data-driven insights that solve practical problems

EDUCATION

BACHELOR OF SCIENCE IN ARTIFICIAL INTELLIGENCE (FINAL YEAR)

Quaid-e-Awam
University of Engineering,
Sciences & Technology

Expected Graduation: 2026

SKILLS

Programming Languages

Python, C++, JavaScript

Computer Vision

Image classification, facial
recognition, real-time tracking

Deep Learning

CNNs, RNNs, MLPs,
Backpropagation, Transfer
Learning

Trading & Automation

Algorithmic Trading, Market
Trend Guidance (MTG)
strategies, Python Automation

CERTIFICATIONS

- AI Essentials (Coursera) – 2024
- Generative AI with Capstone Project (Coursera) – 2024

PROJECTS

Digit Recognition System:

- Built a CNN using MNIST, achieving 98% accuracy with dropout and data augmentation. Deployed it via Flask for live digit prediction.

AI-Powered Trading Bot:

- Developed a bot using Open-CV for chart analysis and Python logic for automated buy/sell signals based on volume, structure breaks, and retests.

Face Recognition System:

- Implemented real-time face detection and recognition with Open-CV and Face-Net. It is optimized for fast, secure access on edge devices.

WORK EXPERIENCE

COMPUTER OPERATOR — CITIZEN POLICE LIAISON COMMITTEE (CPLC) (SBA)

Jan 2022 – Jan 2023

- Managed and maintained computer systems and databases.
- Supported data entry, verification, and reporting tasks.
- Helped troubleshoot software and hardware issues.
- Ensured system reliability and up-time. Worked with teams to improve workflow and data efficiency.

ADDITIONAL EXPERIENCE

- Skilled in Computer Vision, Machine Learning, and Deep Learning (CNNs, ANNs, RNNs).
- Proficient in Python, OpenCV, Flask, and AI model deployment.
- Experienced in AI automation and trading bot development.
- Active Kaggler (9 badges) with AI Essentials and Generative AI Specialization certifications.
